Subject: Oberstar Ammendment

cc: J. Boland, S. Parrish, M. Winokur

The amendment by Oberstar may provide some opportunity - slim though they be. Can we have a brainstorming session next week?
The following are seven topics for discussion:

- implications on current bilateral agreements
- when involvement of the president, who must direct secretary of transportation to change those agreements
- possible trade implications
- weakness of 1989 DOT study regarding ETS
- competitive disadvantage of our carriers until other carriers are made to comply
- SRG's in other countries and U.S.
- Aviation safety

I've asked Jonathan to pull together some possible arguments that Matt has agreed to run by David. Jim is looking into some other possibilities.
